What is Fusion?

Fusion is an online Learning space where teachers can set and share learning with students and parents and where the whole learning community can communicate. It can be used on computers, smartphones and tablets, any device with an internet connection, or using our App and can operate in 104 languages.

Who can use Fusion?

- Teachers and other staff, students, parents and guests all have their own account that is personalised to their individual classes, events, assignments and messages.
- Individual parents have their own accounts, so students do not need to share logins.
- Consultants, visitors and stakeholders can also login to parts of the community if required.

How is Fusion managed?

- Fusion can be served online as a cloud service, or in a dedicated server online or hosted individually inside a school or college.
- It can be managed by individuals or groups within the school or controlled by a team who have visibility of many establishments, for example within a Trust or Group of Schools/Colleges.
- A one-time setup means that ongoing administration is minimal.

Who designed Fusion?

- My Learning created their initial product in 2009; their team consists mostly of Teachers and ex-Educational consultants with backgrounds in ICT and curriculum teaching.
- They support a population of over 150,000 users in 10 countries.
- Company policy is to develop what end-users need and request, and then hand the results back to the entire community so that everyone can make use of improved tools and features and benefit from them.

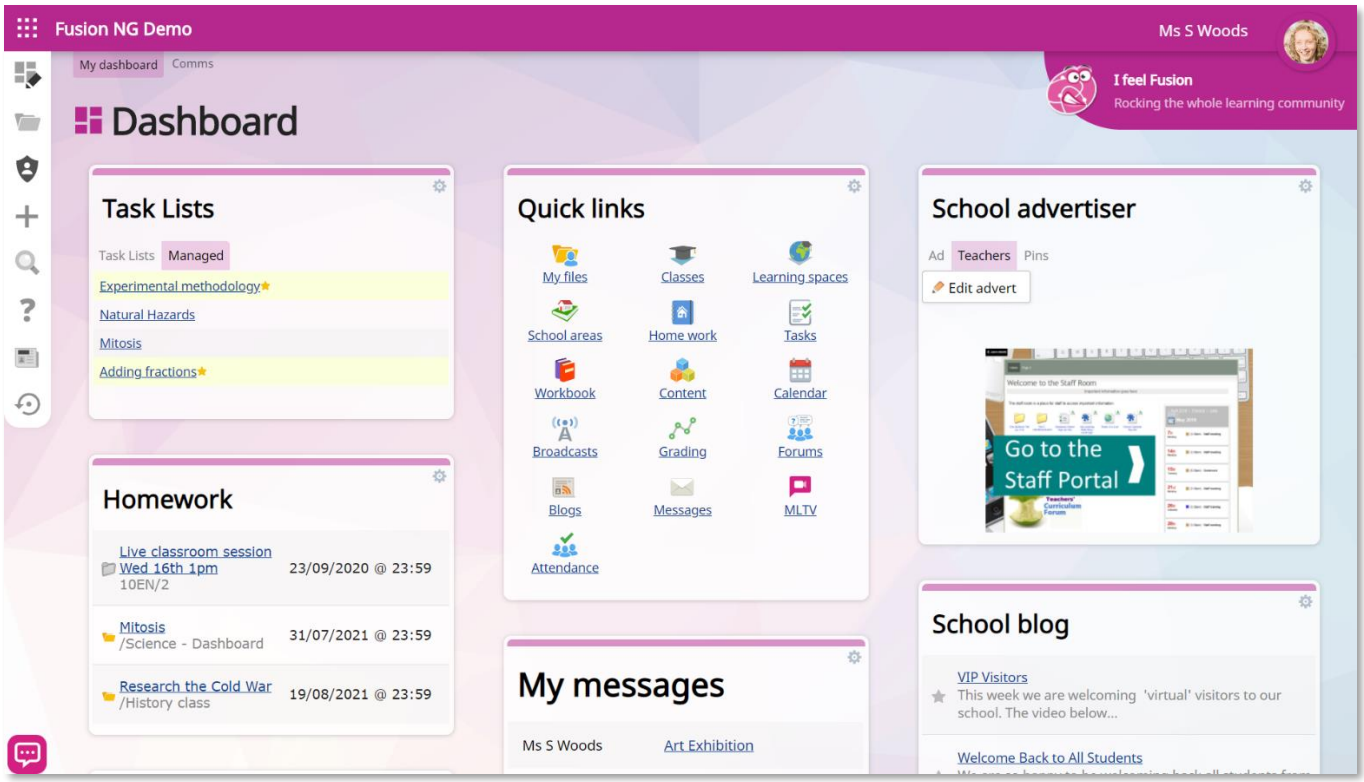
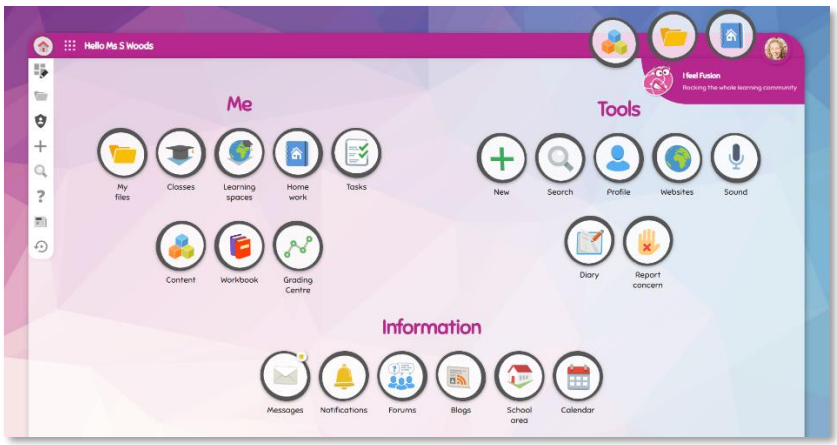
The Learning Environment

Learning environments need to consider not just the device, but the **ability** and **age** of the end-user, and provide a customisable experience. The interface also needs to consider that the user may not have English as their preferred language.

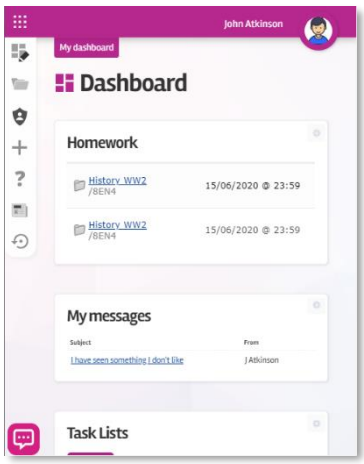
Desktop



Desktop or Tablet



Smartphone



Fusion provides **2** layouts, button and enhanced dashboard.
There are currently 69 customisable themes, available. Student and teacher dashboards can be configured and fixed centrally and can be branded to suit your organisations style, logo and colourway.

What about content?

We know that over 80% of content publishers don't share their materials outside of their own website, meaning that students and teachers have to remember many logins and passwords. The Content Library has been designed to store credentials securely for each user. Once users have logged in for the first time, students and teachers click to seamlessly access content providers directly from inside Fusion. The client selects which content providers will be visible and to which audience type.

184 Content Providers

Our product currently supports 184 providers, and the list continues to grow. We don't charge any fees at all for attempting to integrate with a provider. If your establishment or group requires other providers, we work directly with them to make it happen wherever possible. We do the work for you.

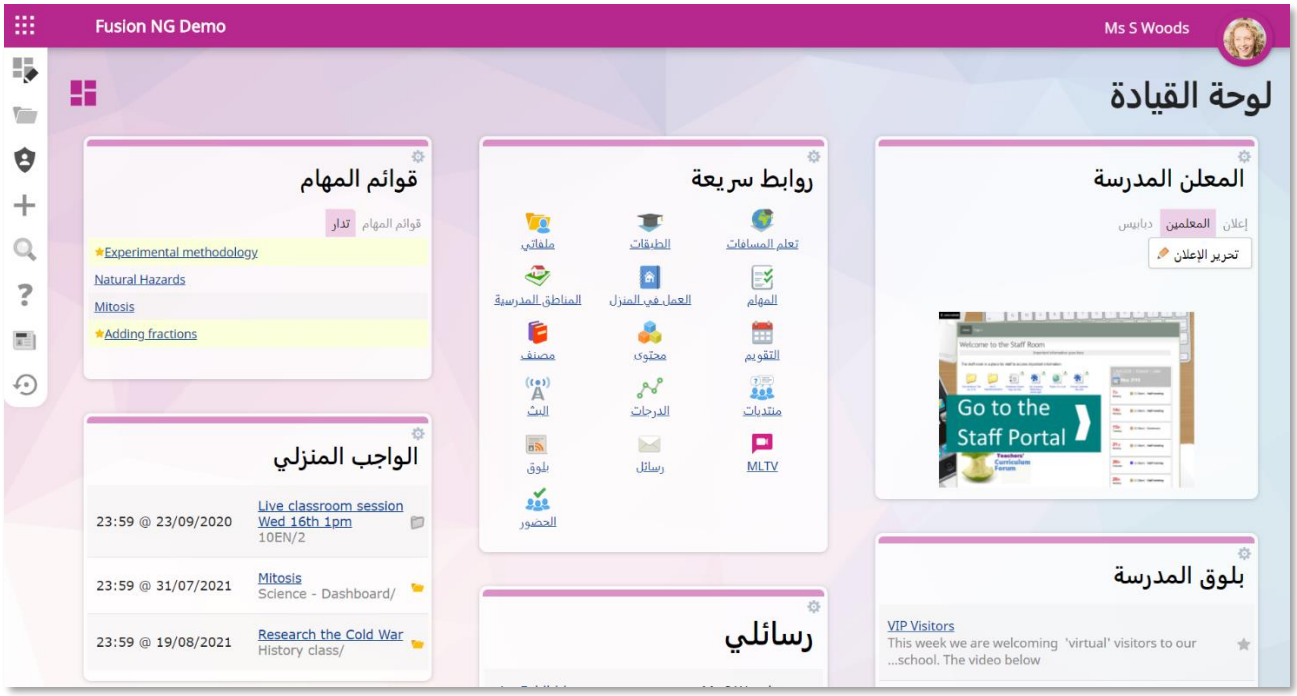
110 Languages

We support 110 languages, more than any other provider – supporting 92% of the world's language needs, for students, parents, teachers and staff.

All users can select their preferred language. This choice will follow the user wherever they login from.



Fusion also operates in two languages at the same time if required.

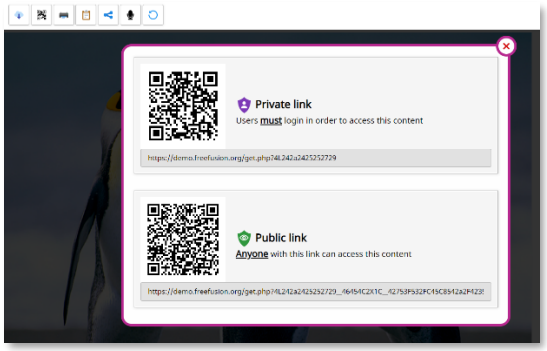
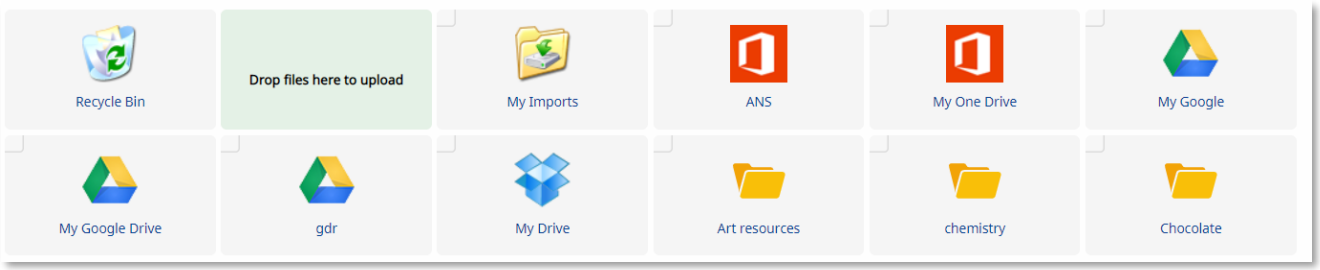
File Sharing

Our drag-and-drop online file manager supports every file type you could ever need.

All files containing text are automatically tagged with keywords gathered from their content. Teachers can also clone work to re-distribute effortlessly and share content to any device in a classroom setting with a simple scan of a QR Code too.



Fusion can also form 'connections' to your cloud file storage such as Microsoft 365 and OneDrive, Google and Dropbox, making it easy to grab files and share them with students and colleagues.



Individual student lockers allow teachers to provide learning materials online for individual students for differentiation and to meet individual needs.

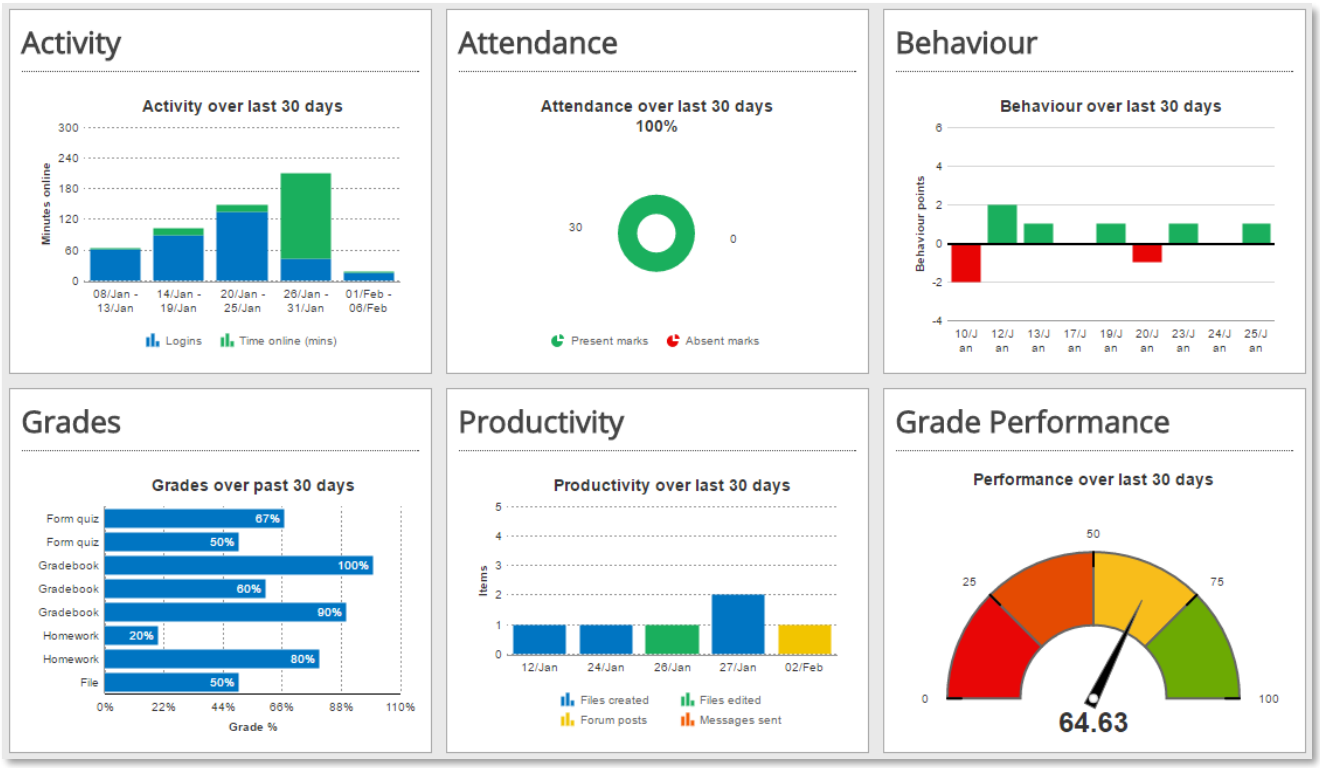
Information Management

Fusion integrates with a range of 3rd party Management Information Systems (MIS) and Student Information Systems (SIS).

SIMS	iSAMS	Engage	Others available

Depending upon the nature of the integration, Fusion can synchronise Students, Teachers, Parents, Timetables, Behaviour, Attendance and termly reports – all delivered via tablet, smartphone or desktop to parents, teachers or even students.



Over 100 individual data points are recorded for every single user of the system, allowing for advanced reporting and summary statistics for Parents, Teachers, managers, and support staff.

Parent Portal

Parent communication is a fundamentally important part of Fusion.

Parent users access Fusion via the Parent Portal. You decide the availability of features that parents can see and controls the methods of communication.

Parent portal features include:

- Presentation of data from your MIS system including attendance, behaviour, timetable and reports.
- Controlled 'view only' access to as much of their child's VLE content as needed.
- Access to homework and support materials to promote parental support for home learning.
- A full range of notifications.
- Optional teacher discussion tool.
- Fusion provides an App for all users including parents that enables instant push notifications and keeps parents logged in.

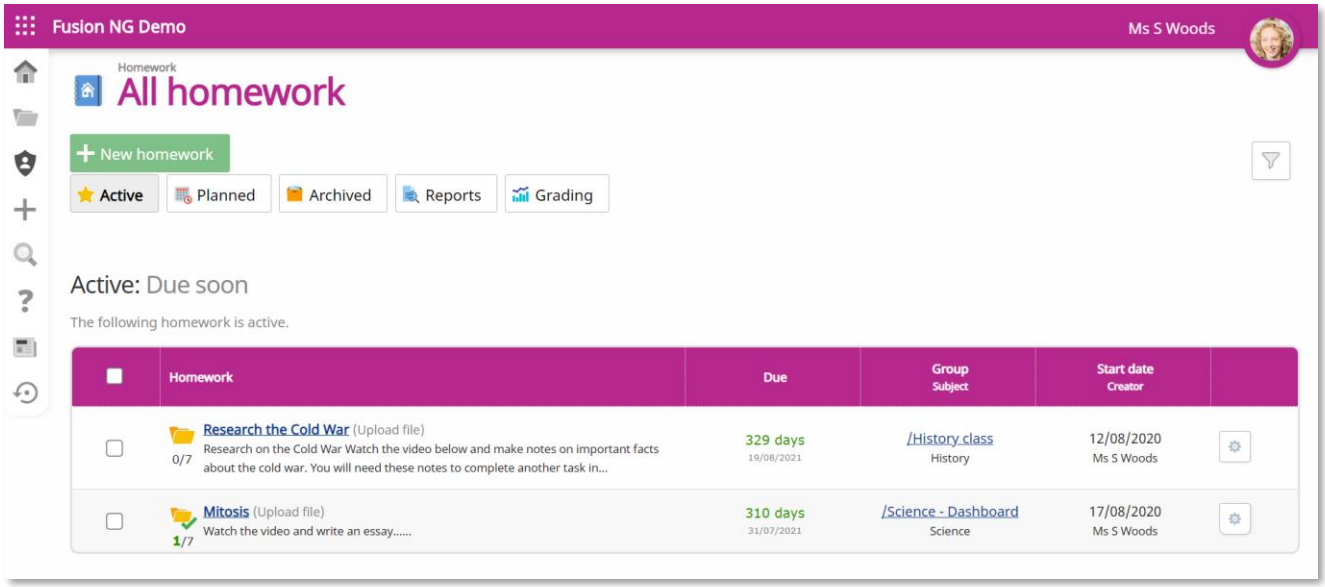
Learning and Teaching Tools

Fusion is equipped with an extremely broad range of modular teaching, creation, communication and assessment tools which teachers can use at their discretion both inside and outside of the classroom, ensuring that Fusion meets the needs of every learning style and structure. Below are just a few of the key learning tools. Contact our team for a tour of everything Fusion can offer your school.

Homework	Forums	Blogs	Quizzes
Tasks	Reporting	Calendar	Messaging
Learning Spaces	Markbook	Workbook	Websites
Grading	Embedding	Feedback	Diary

Homework

Fusion provides a streamlined and powerful homework/assignment handling tool. Student assignments are set, marked, graded, feedback provided and work re-submitted in a carefully designed workflow.

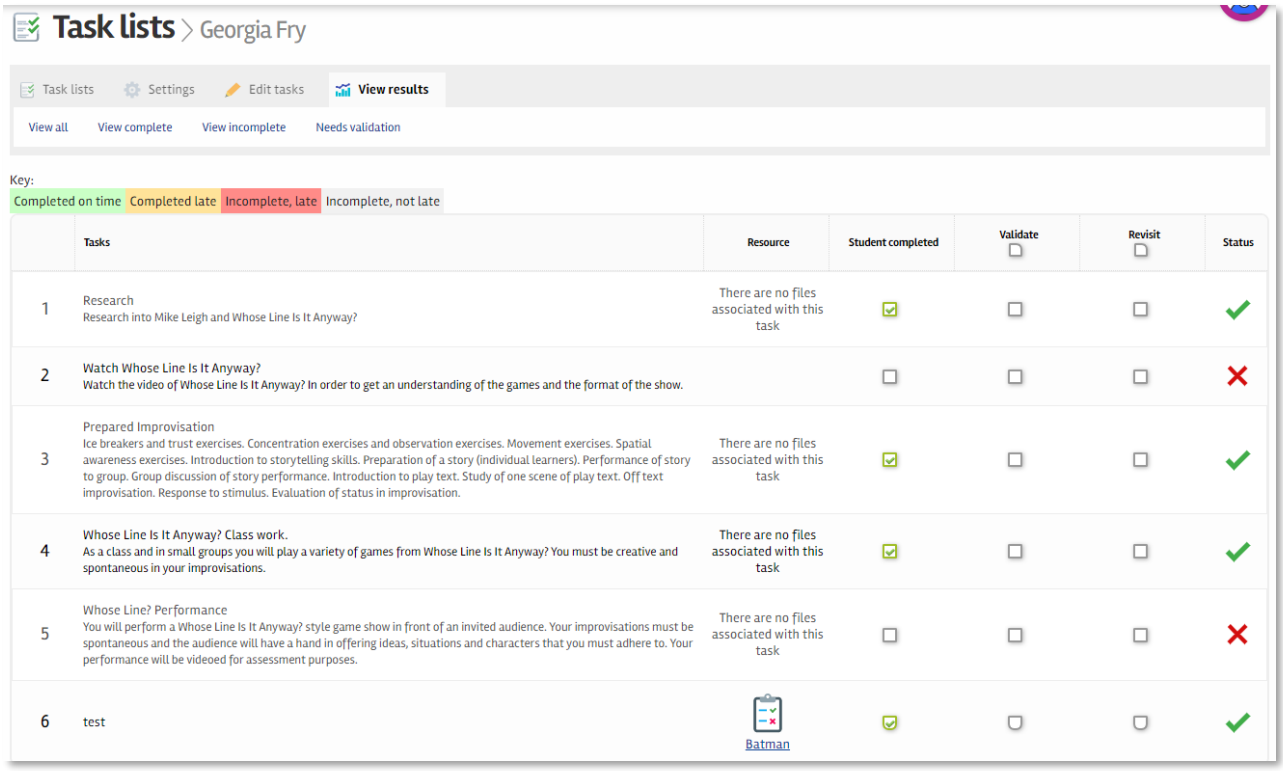


- Easy to set for whole groups or selected members of a group.
- New and updated items are clearly highlighted for action and students and parents notified.
- A full range of multimedia resources and links can be attached with ease.
- Teachers manage homework from a single page.
- View, mark and grade work.

My Learning (UK) Ltd
Suite 3 Kingsland House
Stafford Court. Telford
TF3 3BD. United Kingdom
+44 8451 543211
https://www.mylearningltd.com

- A marking tool allows teachers to apply marks from the organisations mark scheme and drop comments directly into students' work.
- Version control. Students can re-submit revised versions.
- Tools for feedback and dialogue between teachers and students.

Task Lists



- Task lists provide routes through learning.
- Can be assigned to anyone, staff or students.
- Progress through tasks is tracked and monitored from a single page.
- Quizzes can be included as assessment tasks.
- Ideal for lesson cover.

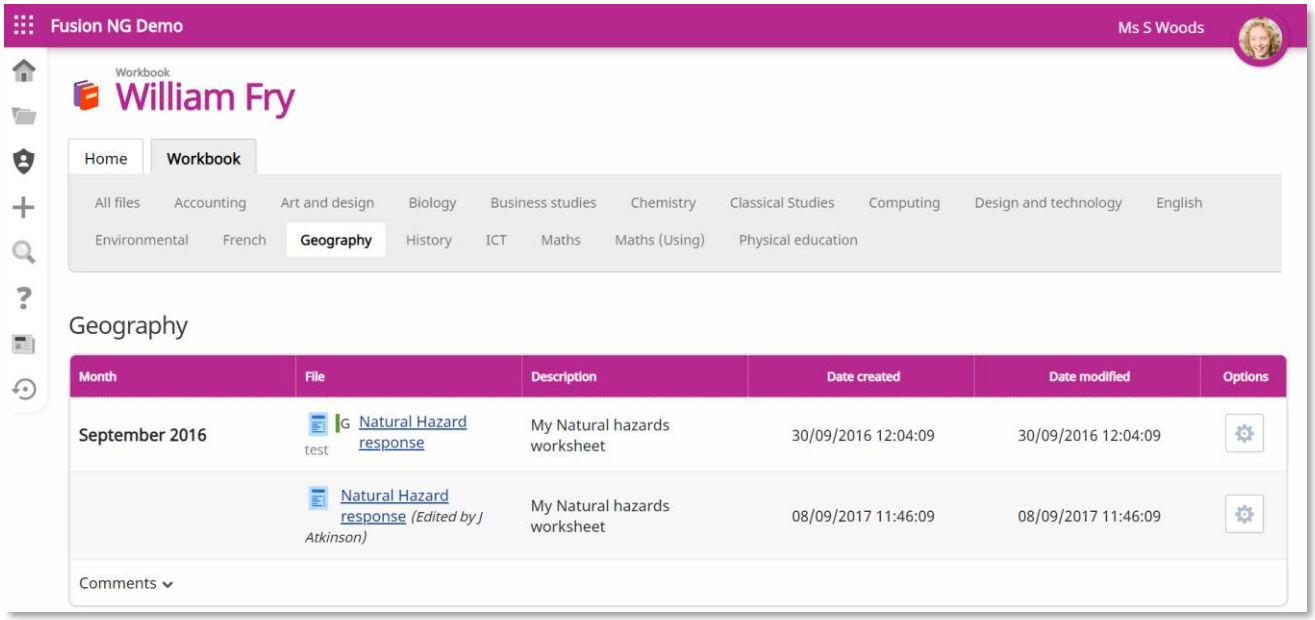
https://www.mylearningltd.com

Workbook

- A Workbook is a repository of student work arranged by subject and in a timeline.
- All teachers can view and mark work via group or individual student pages.
- Students can add work to a workbook but cannot delete a document once submitted.
- Evidence of students' progression.



My Learning (UK) Ltd
Suite 3 Kingsland House
Stafford Court. Telford
TF3 3BD. United Kingdom
+44 8451 543211
https://www.mylearningltd.com

Markbook

- An integrated Markbook where grades can be added manually (for work occurring off platform) or can be imported from existing homework, task lists or quizzes.
- Reports generated by subject or category (homework, coursework, exam).
- Weighted assignment types where required.

Creating Websites

Every student and teacher within Fusion can create, share and curate their own personal website. Staff can also allow students to 'share' their websites with others.

Every teacher can also create group websites for their class or learning space.

Your organisation can create a website that can be published to an external FTP space.

My Learning (UK) Ltd
Suite 3 Kingsland House
Stafford Court. Telford

https://www.mylearningltd.com

Calendars

- Whole school/college events.
- Group events can be added by teachers – visible to group members only.
- Personal events.
- Connect to ICAL/ICS formats from other providers
- Create events for parents.
- Deadlines for assignments can be added, removing the need for student planners.

Grading

Fusion is equipped with a range of built-in, multi-curricular grading templates which can use out of the box. You can also design your own grading systems and use them across many areas of the platform.

Icons, pictures, levels, percentages, letters and any combinations can be used or created as part of your marking scheme.

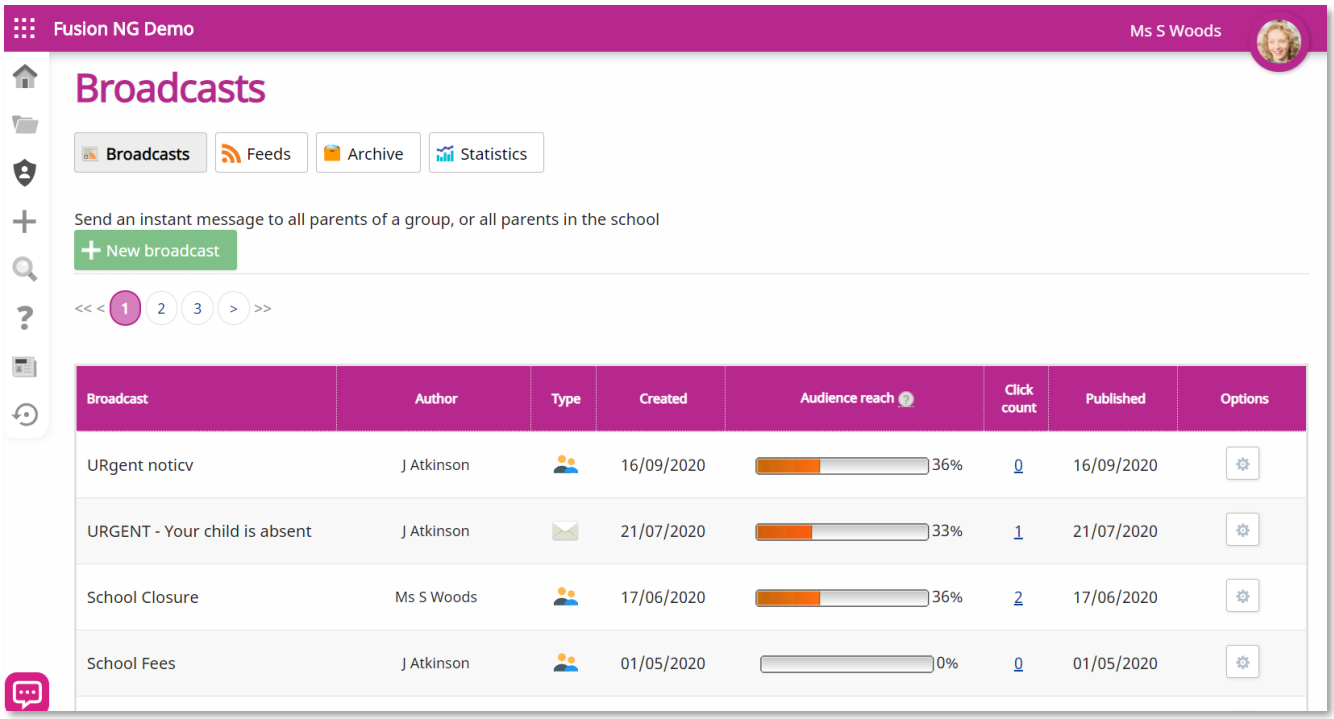
Broadcasts

Connect to your learning community be leveraging our built-in broadcast service, which allows you to send notifications to groups, individuals or your entire organisation and can be delivered instantly to devices. Our free app works seamlessly with Fusion on Android and IOS.

- Full multimedia messages sent out to parents.
- Instant notification via App and email



Notifications

- Highly configurable automated notifications for each user type; teachers, parents and students.
- Range of pathways including App, email and pop-ups.
- Triggered by a large selection of key actions on the platform, e.g. ‘Homework has been set’.
- Can be instant or compiled into daily digest.

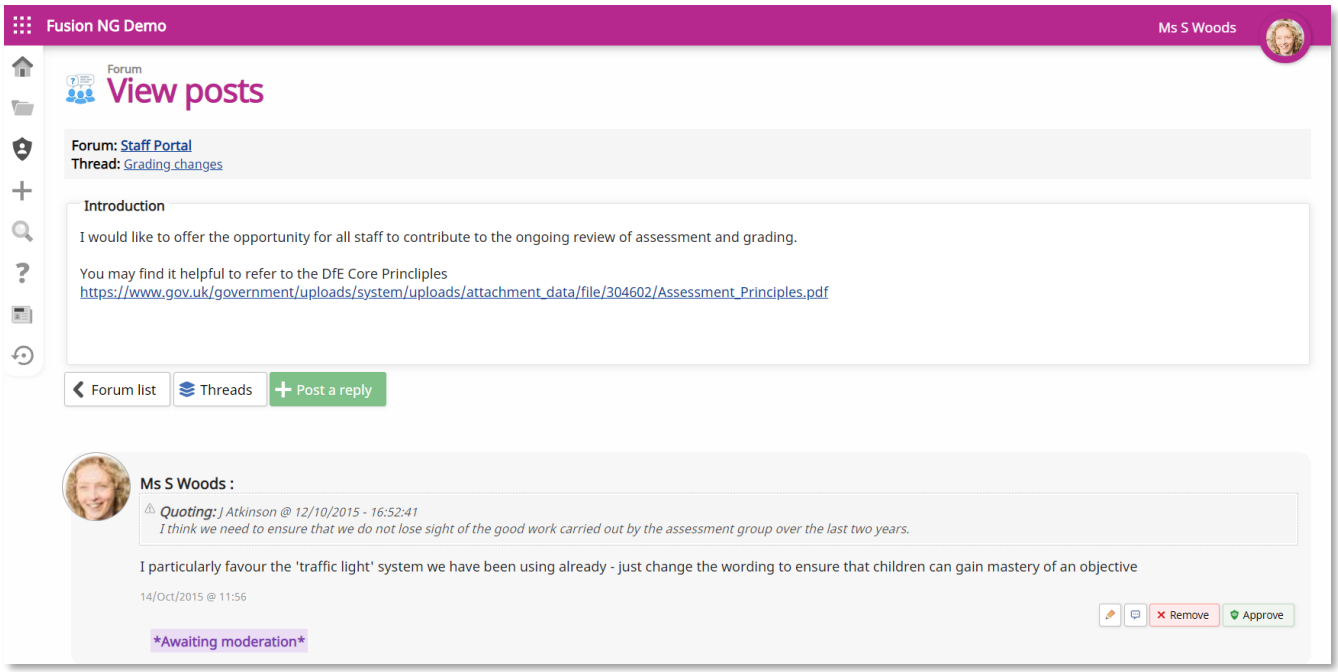
Forums

It's important to retain control of communication within your education environment, so Fusion comes with unlimited Forums so that Teachers, Staff and Students can exist in multiple groups and engage with an array of media inside multi-threaded forums.



- A safe, moderated forum tool.
- Full multimedia participation by students.
- Provided for every class/group - no need to set up.
- Protected by Fusion's built-in bad-word censor.

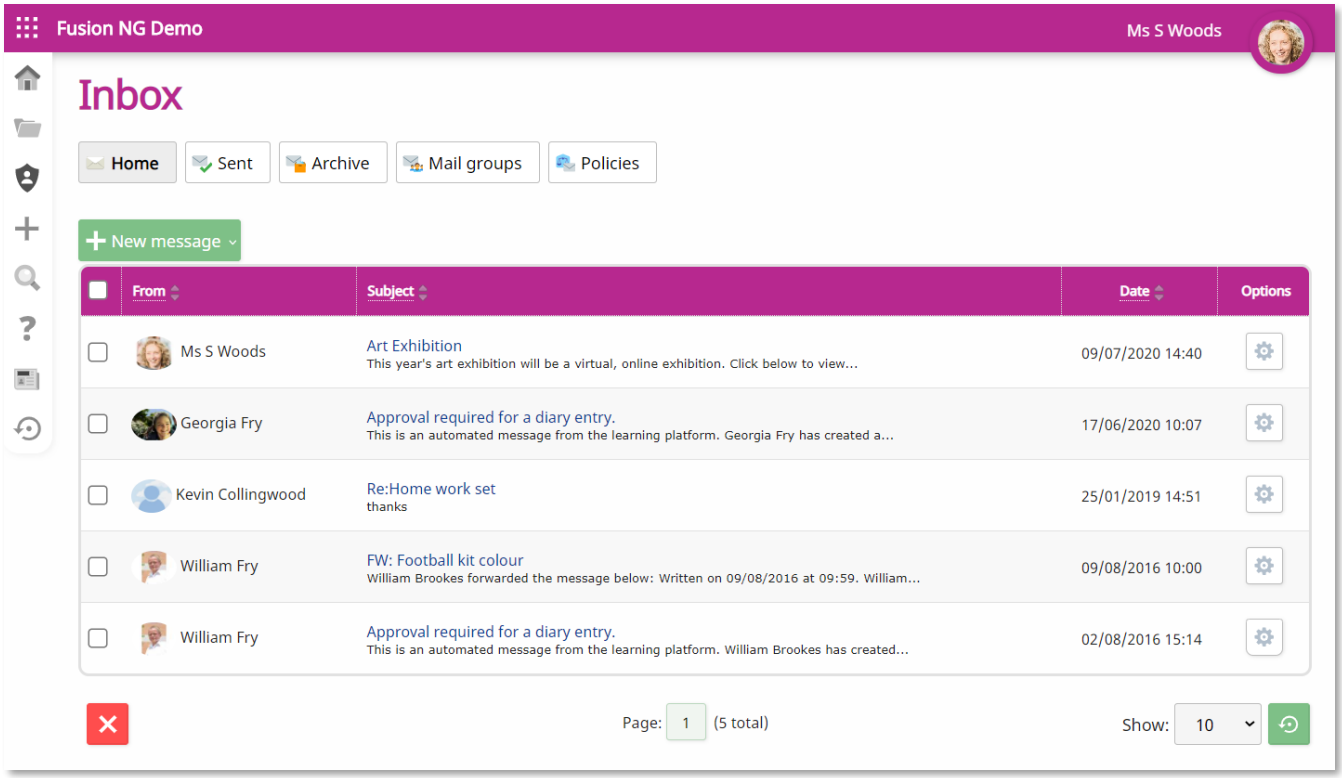
Messaging

You can communicate quickly and easily with anyone using Fusion's self-contained messaging platform. No more lost emails or discussions! Allow teachers and students to communicate in a monitored, controlled and safe environment. Share content, homework tasks and other links instantly. Messaging works on our APP too, or any device in any language.



- Internal messaging system.
- Student participation configurable.

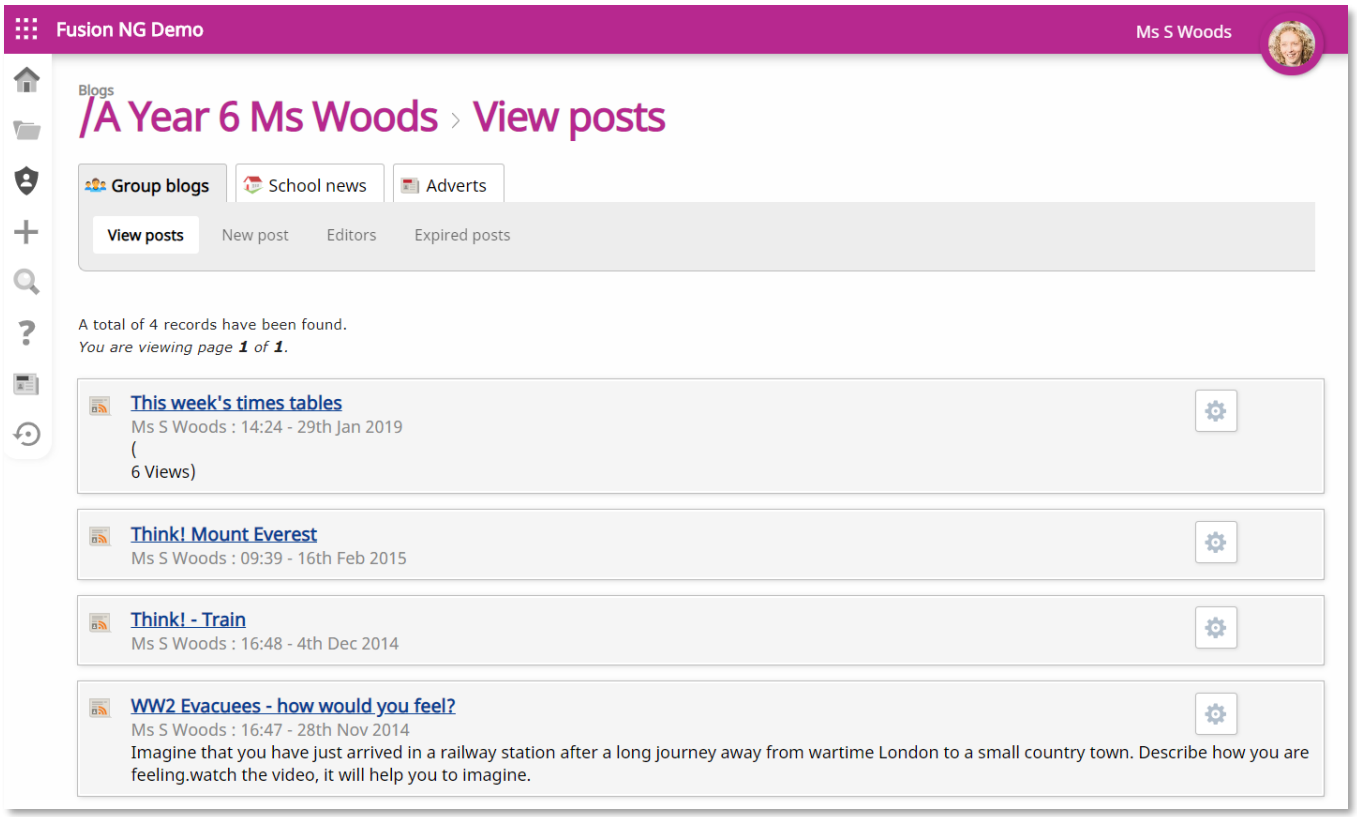
https://www.mylearningltd.com

Blogs

No need to use 3rd party tools which can be difficult to login or use. Fusion has its own blogging engine so that teachers can run blogs for their classes, or the entire school. You can even allow parents to view them too.



- A safe and controlled blogging environment.
- Moderated.
- Can be used for everything from simple news feeds to full discussions.
- Includes a blog for the whole community and one for every group - no need to set up.

Advertiser

The system also comes with a built-in advertising engine which allows you to release news, adverts, information or promotional messages to Parents, Teachers and Students. It's a great way of letting people know about important events and guaranteed to appear when they login.

- Flexible space, one for each user type, to promote and link to any content.
- Appears on all user dashboards.

Student Safety

Our product is equipped with a built-in “bad word” filter. This is a list of unacceptable terms, language and words. It is an initial safety net to detect and prevent bad behaviour within the product. Any location that requires user input is automatically scanned by our filter, the offending item quarantined and a member of staff notified

Importantly, this service also shows the context of the bad word. It logs the date, time and IP location of the user.

Training

We offer a wide range of training services on every aspect of using Fusion, fully bespoke to meet the development needs of your organisation.

- Get up and running with administrator controls, managing users, access to tools and modules, shared content and resources.
- Explore the powerful reporting tools.
- Organise your resources online and share with your learners. Integrate all kinds of resources into lessons, groups, classes, topics. Create blogs, quizzes and websites, set tasks, grade and feedback.
- Find out how to match Fusion to your teaching style.

Our team provides dedicated “Super Skill” training for MoE, Groups and Consortia contracts and we also provide training to groups of 25 teachers per session.

Discover more!

The team at My Learning operate and support Fusion internationally 24/7. We support over 150,000 users in 10 countries with live-chat, telephone, tickets and email support.
